

A BETTER FUTURE starts with an EDUCATION

I grew up in a very small town without the comforts most take for granted like heat, running water, air conditioning, etc., I felt so much shame growing up, but I loved school because education was the one thing that nobody could take away from me. I realized that an education could change my circumstances and it did. So I started ProTrain to help others rise above and create a better life for themselves one person at a time.

Betty L. Gardner
ProTrain College, CEO
