

# A BETTER FUTURE starts with an EDUCATION

*I grew up in a very small town without the comforts most take for granted like heat, running water, air conditioning, etc., I felt so much shame growing up, but I loved school because education was the one thing that nobody could take away from me. I realized that an education could change my circumstances and it did. So I started ProTrain to help others rise above and create a better life for themselves one person at a time.*

**“My skills were not very marketable. But this...”**

*I was not getting along with the manual labor workforce. I decided to do something that challenged me and that I could do from home. My skills were not very marketable. But this Medical Billing and Coding Specialist course prepared me for a career job. I am ready to work in a promising career. — Angela Scruggs*
